

Maverick Enterprises - Solutions Guide

To Restore the C: drive image using Macrium Reflect follow these steps:

*****WARNING*****

**All files and applications added to the C: partition will be erased!!!
Copy all data files and any application installation files to a separate partition or
external drive before implementing system reinstallation!!!**

1. Reboot the computer. At boot menu screen, left-click on "Macrium Reflect System Recovery" option.
2. The recovery option will load a Windows Pre-installation Environment.
3. If you wish to save files or view the recovery file structure, then: In the lower left hand corner, open (double-click) the 3rd icon from the left (looks like a computer monitor icon) to launch "Macrium PE Explorer".
4. Select (left-click 'Open' or double-click) the drive or device that contains your Reflect Image Library (_____). Navigate to and open the folder that contains the image files (_____). Open (double-click) the 'ReadMe.txt' file. The text document of the Reflect Restore Image Library will open. Make a note of the image file name you wish to restore (usually the setup complete image). Close the "Macrium PE Explorer" window.
5. Select the 'Restore' tab in the "Macrium Reflect" window.
6. If the image file list auto-populates in the lower right pane of the window, then skip to Step 8. If not, then proceed to Step 7.
7. Single-click the "Browse for an image..." link in the right window pane to show the available devices. In the window that opens, single left-click the "Computer" icon in the left window pane. Open (double-click) the device that contains the "Reflect Image Library" folder (see Step 4). Open (double-click) the "Reflect" folder and left-click the image file you wish to restore to highlight it. Click the 'Open' button in the lower right hand corner to select the image.

Select Image: _____

8. Once the image file populates in the lower right hand pane, select the image with the image ID shown at the end of Step 7 by single left-clicking in the image box to activate the available options. Single left-click on the "Restore Image" link.
9. In the lower half of the Source/Destination window, click on the "Copy selected partitions" link and select 'Next'.
10. In the lower right hand corner of the "Restore Summary" window, select 'Finish'.
11. Generally, the restore process should not take more than 40 minutes to complete depending on the size of the image being restored.
12. Once the restore process completes, close the "Macrium Reflect" application and allow the system to reboot. This time, **Do not select the "Macrium Reflect System Recovery" option at the boot menu screen.** The system should restart clean and stable.
